# PanicVault

KeePass Sync & AutoFill

Your passwords, your file, your control.

No subscription. No cloud lock-in.

iPhone

iPad

Mac

# Most password managers weren't built for the Apple ecosystem.

01

## Subscription Fatigue

\$36–\$60 per year, every year. Password managers have become another recurring bill that never ends.

02

## Proprietary Lock-In

Your credentials trapped in a vendor's cloud. Switching means starting over. Your data isn't really yours.

03

## Cross-Platform Compromise

Built for every platform means optimized for none. Apple-native APIs like Secure Enclave go unused.

# Your passwords, your file, your control.

A native password manager for Apple built on the open KeePass format.  
One purchase covers iPhone, iPad, and Mac. No subscription. No account  
required. No cloud dependency.

iPhone

iPad

Mac

APPLE NATIVE

# Deep Platform Integration

Built exclusively for Apple using native frameworks and hardware APIs.

## Face ID & Touch ID

Biometric unlock via the LocalAuthentication framework. Master password stored in hardware-backed Secure Enclave keychain.

LOCAL AUTHENTICATION

## Secure Enclave

Hardware-isolated coprocessor with dedicated AES engine. Keys never leave the chip. Anti-replay counters prevent extraction.

HARDWARE SECURITY

## System AutoFill

Native Credential Provider Extension for Safari, Chrome, Firefox, and all apps. Override URLs for custom domain matching.

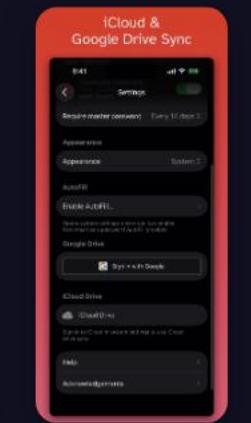

ASCREDENTIALPROVIDERVIEWCONTROLLER

## iCloud Drive Sync

Seamless sync across all Apple devices via iCloud Drive. Smart entry-level merging with side-by-side conflict resolution.

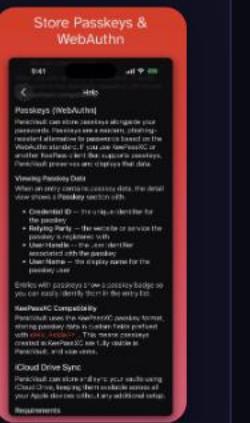

ICLOUD DRIVE API

## Passkeys (WebAuthn)

Store and manage passkeys alongside passwords. Compatible with KeePassXC passkey format for cross-platform interoperability.

AUTHENTICATION SERVICES

## Universal Purchase

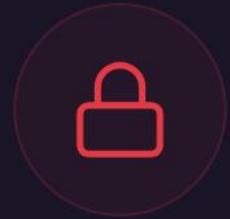

Single purchase for iPhone, iPad, and Mac. Full keyboard shortcuts, drag & drop, and native Mac sidebar on macOS.

UNIVERSAL APP

SECURITY

# Security You Can Verify

Built on proven, open standards. No proprietary encryption.

**AES-256 / CHACHA20**

## Encryption

Industry-standard encryption. Choose AES-256 or ChaCha20 to protect your vault.

**ARGON2D / ARGON2ID**

## Key Derivation

Memory-hard key derivation makes brute-force attacks computationally impractical.

**SECURE ENCLAVE**

## Hardware-Backed

Master password stored in Apple's hardware-isolated Secure Enclave keychain.

**100% COVERAGE**

## Fully Tested

Every line of code tested and verified. Full coverage means confidence in reliability.

## Zero Data Collection

No analytics. No telemetry. No crash reports. No third-party SDKs. No advertising IDs. Nothing.

OPEN FORMAT

# No Lock-In. Ever.

Your vault is a single encrypted file in the open KeePass KDBX 4 format. Back it up, move it, or open it in any compatible app on any platform.

Entry history, custom fields, attachments, group hierarchy, custom icons, and recycle bin are fully supported. Nothing is lost, nothing is proprietary.

*"Your data belongs to you, not to us."*

COMPATIBLE WITH

KeePass

KeePassXC

KeePassDX

Strongbox

and every KeePass-compatible app on every platform

FILE FORMAT

**KDBX 4**

# Why Feature PanicVault

What makes PanicVault a perfect fit for the App Store.

## 1 Deep Apple API Integration

Uses Secure Enclave, LocalAuthentication, ASCredentialProviderViewController, iCloud Drive, and AuthenticationServices — not a cross-platform wrapper.

## 3 Passkey Support (WebAuthn)

Supports the next generation of authentication that Apple is actively promoting across the ecosystem.

## 5 Universal Purchase

One purchase covers iPhone, iPad, and Mac. Native experience on each platform with full keyboard shortcuts on Mac.

## 2 Privacy as a Core Value

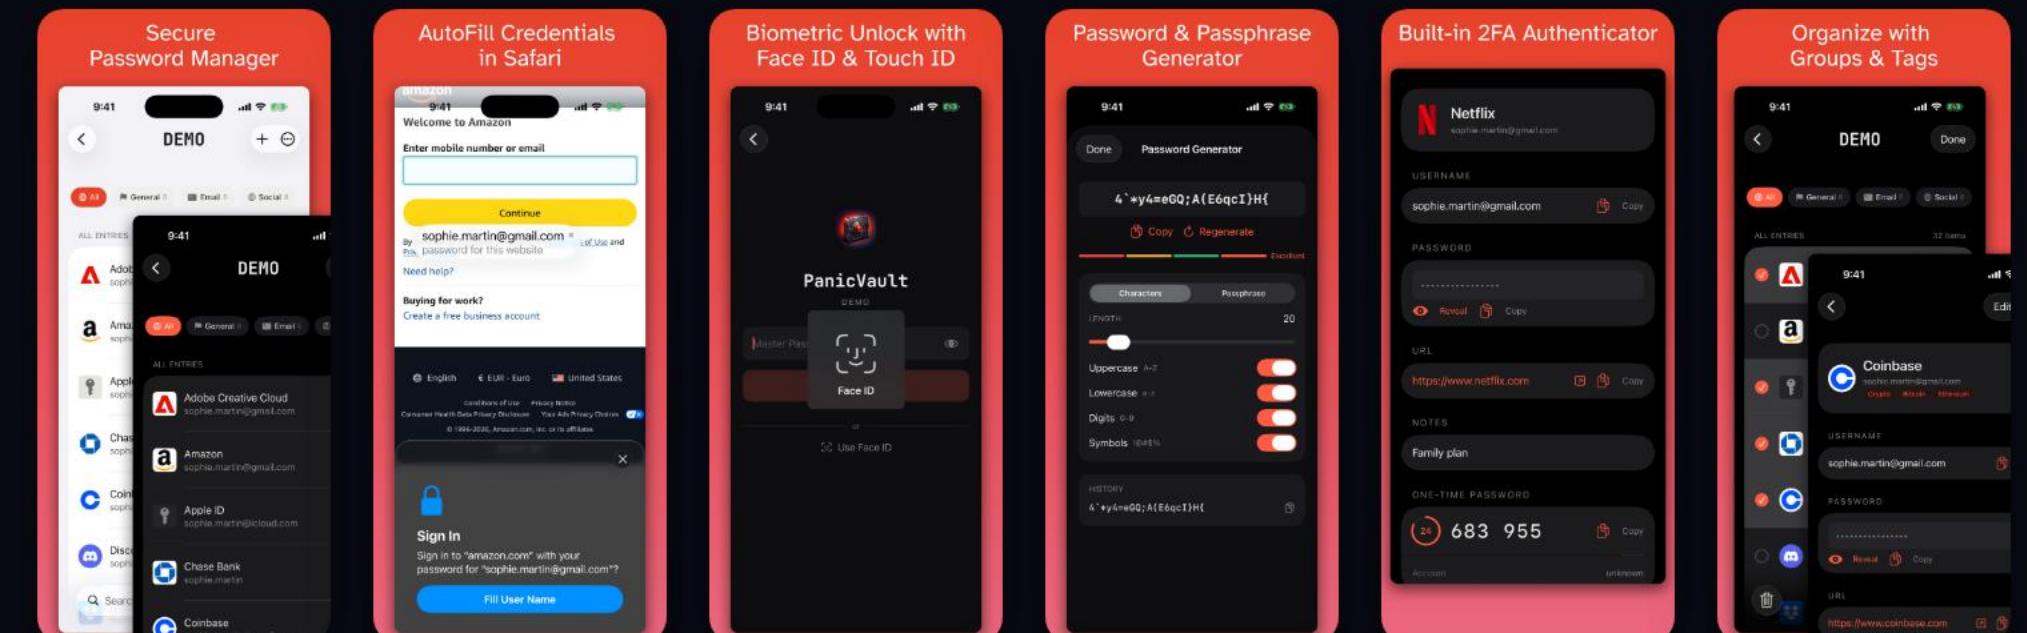

Zero data collection. No analytics, no telemetry, no third-party SDKs. Aligns with Apple's privacy-first philosophy.

## 4 Offline-First Architecture

Every feature works without internet. Cloud sync is optional. The app works perfectly in airplane mode.

## 6 Open Standard, No Lock-In

Uses the open KeePass KDBX 4 format. Users are never trapped. Data portability is a first-class feature.

# Get PanicVault

One purchase. All your devices. No subscription.
